

# GovConnection's Customer Briefing Center

Get In-Depth Interaction with Today's Technology

GovConnection's Customer Briefing Center (CBC), located in parent company PC Connection's headquarters in Merrimack, NH, offers you the opportunity to engage in technology presentations with knowledgeable GovConnection services engineers. Demonstrations include show-and-tell sessions with emerging technology products and presentations that showcase innovative new IT solutions designed to improve efficiency and reduce costs.

We currently offer the following product demonstrations:

## Server Demos

HP BladeSystem  
VMware Server Virtualization  
VMware SRM  
VMware Desktop Virtualization

## Network Demos

HP ProCurve Network  
Polycom Videoconferencing\*

## Power Demo

APC Rack, Power, and Cooling\*

## Storage Demos

Compellent Storage  
HP EVA Storage  
EMC VDI  
EMC Celerra Storage  
EMC SRM  
EMC Replication Manager (Business Continuity Demo)

\*On-site demo only

*See reverse side for full details on our entire selection of demonstrations.*

## Experience

**GovConnection's Customer Briefing Center in person or online through an interactive virtual session. We are more than happy to schedule customized presentations at your request.**

**Ready to test-drive new technology? Contact your Account Manager today to get started.**

## Server Demos

**HP Blade System**—Learn how to achieve superior efficiency by provisioning resources with HP's onboard administrator. During this demo, you'll get a chance to examine chassis components, including blade servers, blade workstations, and storage blades. We'll also explain TCO reductions achievable by using rapid deployment and virtual connect.

**VMware Server Virtualization**—This demo highlights virtualization features ranging from VMotion to DRS. You'll see how to provision servers and increase resources as well as learn how to create a high-availability infrastructure and fault tolerant virtual machines.

**VMware SRM**—The VMware Site Recovery Manager (SRM) demo shows how to set up and test a disaster plan and a recovery site, with a special focus on creating recovery groups to prioritize the failover.

**VMware Desktop Virtualization**—Learn how to create and manage virtual desktops, blade PCs, and terminal services environments. We'll discuss various aspects of desktop virtualization and show you how to optimize your resources.

## Power Demo

**APC Rack, Power, and Cooling**—This demo highlights the management functions and specific features of APC's rack, power, and cooling products (on-site demo only).

## Network Demos

**HP ProCurve Network**—Get an in-depth look at the full range of HP ProCurve offerings and explore a Web-GUI interface that delivers simplified management.

**Polycom Videoconferencing**—This demo examines telepresence and videoconference communications. You'll see how to connect to other sites and experience enhanced videoconferencing (on-site demo only).

## Storage Demos

**Compellent Storage**—See how Compellent's Enterprise Manager can provision and manage storage with just a few mouse clicks. Explore advanced features like Data Progression, Thin Provisioning, and Instant Replay.

**HP EVA Storage**—This demo showcases the EVA Management interface and illustrates the benefits of disk groups, as well as how easy it is to create and present vdisks.

**EMC VDI**—Learn how to rapidly deploy virtual desktop images using Celerra snapshot technology. See how to log into a new VDI image and explore how management and deployment of a desktop infrastructure can be simplified.

**EMC Celerra Storage**—This demo shows how to set up a CIFS share, manage checkpoints using SnapSure, recover deleted files, and provision using the MS initiator.

**EMC SRM**—See how using VMware SRM in conjunction with Celerra replicator can automate the recovery of SQL in a disaster scenario.

**EMC Replication Manager (Business Continuity Demo)**—Get an expert understanding of Replication Manager integration with Microsoft Exchange, including full database and single mailbox recovery in an Exchange environment. Delve deeper in an advanced demo and learn how to recover Exchange boot volumes along with VMware virtual machine level restores.
